Process Piping, Offshore, Pipelines

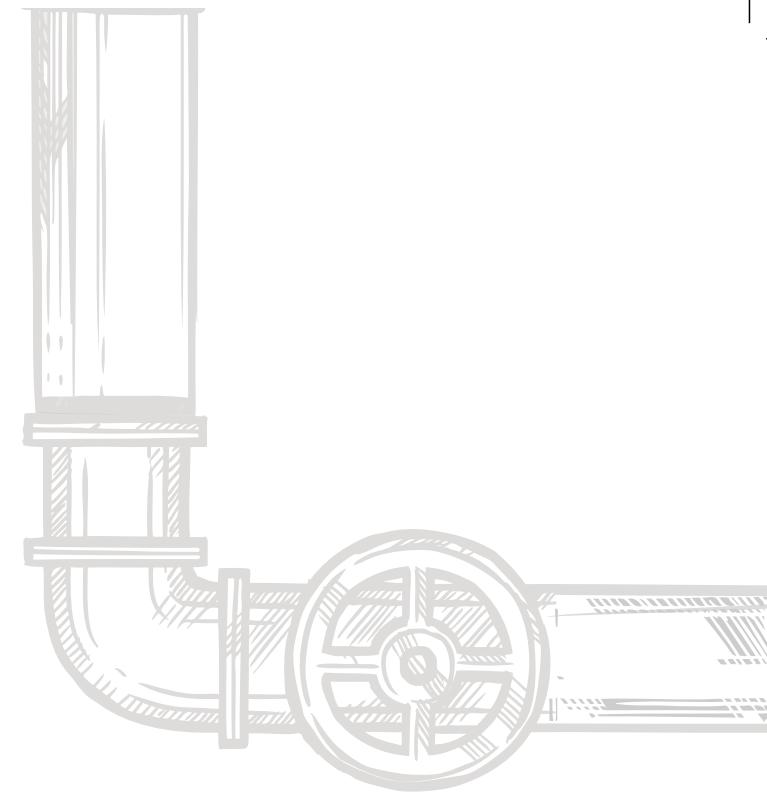

A LEGACY OF EXCELLENCE FOR A MODERN WORLD.

Process Piping
Offshore
Pipelines

MISSION

To go the extra mile for every customer, delivering first-class turnkey solutions on a global scale, achieving sustainability through efficiency and excellence.

55+

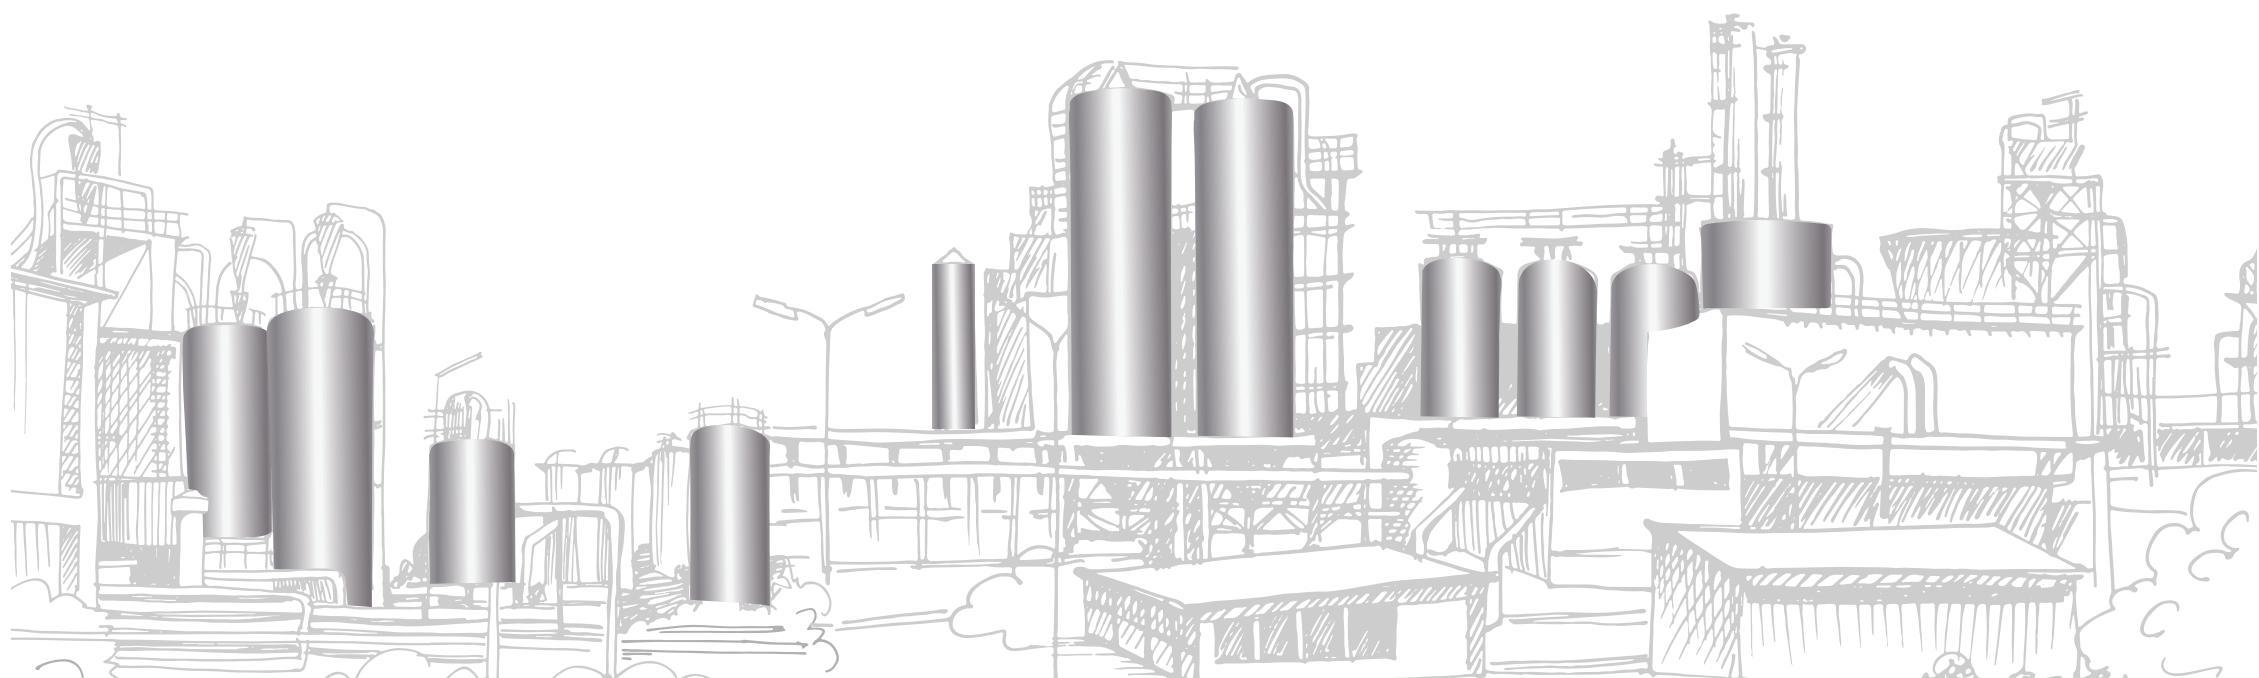

Years of
Expertise

ABOUT US

Founded in Düsseldorf in 1966, Kürvers is an internationally operating group of companies and a proven specialist for pipeline projects in the petrochemical and energy industries. The size and structure of our organisation, together with our financial independence and highest degree of transparency and reliability, make us the preferred partner for our customers and suppliers across the globe.

With over 55 years of experience, we secure worldwide procurement of materials for comprehensive projects involving many parties, specialised in different areas. Thanks to our long-standing connections, we know our suppliers' competencies and capacities and guarantee unrivalled delivery.

Reliability, integrity and collaboration are the cornerstones of our relationships with customers and suppliers alike. We go above and beyond to solve any potential problems, exceeding expectations and making your wishes our own.

Turnkey solutions

No matter what you have in mind, we can deliver. We pride ourselves on our ability to go to any lengths to carry out your project successfully and ensure that all aspects are delivered with excellence.

To support that, information management is an essential part of our quality management according to ISO 9001. We have developed a computer-supported network reflecting all areas of our group. Thus, prompt access to detailed information is guaranteed and all parties involved, including customers, suppliers and project managers, always have the same level of information. We have a training programme for all employees, guaranteeing that knowledge and experience gained from individual projects is shared across the Kürvers group. Thus, all our employees have developed expert knowledge across core competencies and are able to support you in all matters.

Delivering Detail

It's the small things that make the biggest difference. When large projects are nearing completion, it's often the details that determine success or failure. Our exceptional level of commitment and flexibility ensure that our international teams are able to find the right solutions and implement them swiftly thanks to existing structures.

We are able to respond quickly and competently whenever special materials are required, or clients are in need of an urgent solution.

A photograph of a large industrial facility, likely a refinery or chemical plant. The image shows several tall, cylindrical structures with ladders and walkways, and a dense network of thick, metallic pipes and scaffolding. The lighting suggests either sunrise or sunset, with a warm glow on the left side.

Our experience
is the **essence** of
the industry.

WHY KÜRVERS

EXCELLENCE

Kürvers staff have an impressive 1000+ years of accumulated industry experience and relationships with the leading manufacturers, stockists and service providers worldwide.

EXPERIENCE

With 3000+ completed projects since its foundation in 1966, Kürvers has a thorough understanding of the critical requirements for successful piping & steel supplies.

COLLABORATION

Kürvers operates globally with a far-reaching supply network. We are always close to our clients, providing unrivalled, personal service wherever they are.

QUALITY

is at the forefront in everything we do, it's our absolute priority, providing you with the highest quality in products and services. Kürvers has been ISO 9001:2015 certified since 1990.

INTEGRITY

Dedicated teams ensure seamless project management so that our clients can focus on their tasks.

CUSTOMER FOCUS

We are dedicated to our customers. We listen and understand their needs, forging life-long partnerships and ensuring exceptional delivery through flexible, tailor-made solutions.

GLOBAL REACH

**Our headquarters
in Germany work
collaboratively with our
locations all over the world.**

We know that regional particularities influence business. Understanding the language and the culture, face-to-face contact and one's own experience of the location, are all crucial for successful business relationships. This is why we have locations all over the world.

Our headquarters in Germany are closely linked with agents and locations in all relevant centres of commerce. Our representative offices work closely and collaboratively together, benefitting from regular cross country staff exchanges and decades of centralised and unified leadership. Local employees can be called upon at any time to manage large projects and deadlines or perform on-site inspections. Our expertise lies not only in our superior international supply sources, but also for our premium, personal service – worldwide.

INTEGRATED SOLUTIONS

Incomparable knowledge

Major projects often involve major challenges. Thanks to over half a century of industry experience, we offer you comprehensive know-how, a reliable network of suppliers and extensive expertise gained in the most diverse projects. As a Kürvers customer, we help you manage the most demanding, unusual projects, cost-effectively and on schedule.

Exceptional service, it's all in the detail

- We arrange complete packages for you – with pipes, fittings, flanges, valves, filters and strainers, bolts and nuts, gaskets, plates, beams, profiles, piles, weld consumables and insulating materials.
- We order customised products according to drawings.
- We co-ordinate the work of all manufacturers with their different specialisations.
- We check that all your specifications are met.
- We arrange standard coatings as well as coatings meeting special requirements.
- We procure special sizes outside the usual standards and take care of special markings, product-specific packaging or special fixtures to make transport easier.
- We organise all kinds of transport, from small express deliveries by courier service or aircraft to overseas transport with complete shiploads.
- And in an emergency? We respond immediately thanks to our local presence and we also get you the first-aid kit.

We deliver
comprehensive
knowledge, a trustworthy
supplier network, and
extensive industry
experience acquired
over more than 55 years.

UNRIVALLED QUALITY

Your success is our success

For Kürvers, quality has always been an absolute priority, long before quality management systems and accreditation to ISO 9001 was introduced. This is because we recognise that only top quality products and services can continue to guarantee that our customers can successfully complete their projects. Our goal is to provide you with these high quality products and services day after day.

Excellence, always

With our quality management system and processes, which are certified by LRQA , we guarantee that both stock deliveries and deliveries ex-works satisfy the international standards and meet our customers' specifications.

At Kürvers, we continuously seek innovation in everything we do and strive to continually improve our quality of service to our customers. Our Technical and QA departments always vet potential suppliers and carry out regular audits at their premises after approval. We regularly record and evaluate performances of both our internal and external partners.

We also provide project documentation, including quality procedures and plans, to support our customers' quality management processes. Data books with approved documentation and certificates, etc., are provided to your requirements on project completion.

For Kürvers,
quality has always
been an absolute priority.

Approved and registered – worldwide.

We are approved by many customers for supply around the world and have a long and successful quality record. In addition to our LRQA to ISO 9001:2015, we have been approved by many other certifying institutions. For example, by Achilles Joint Qualification System, as a supplier of the oil industry in Norway and Denmark. In addition, we are registered in the First Point Assessment Ltd. and Utilities Vendor Database.

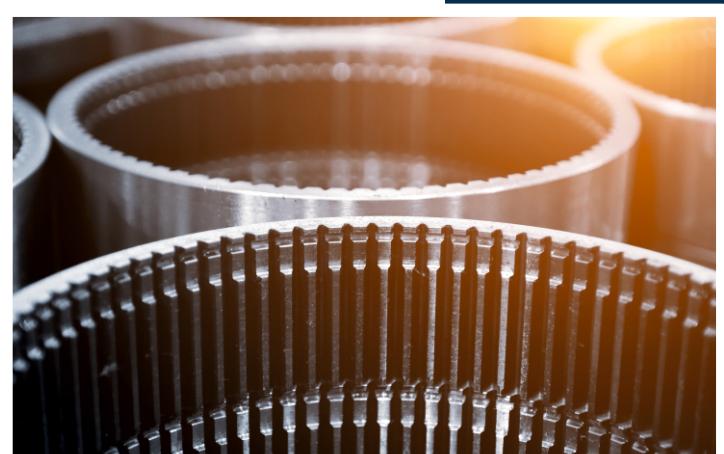

PRODUCT RANGE

Products defined by you.

Kürvers can supply both standard materials from stock or, where required, we can arrange for materials to be manufactured strictly in accordance with your project's individual needs.

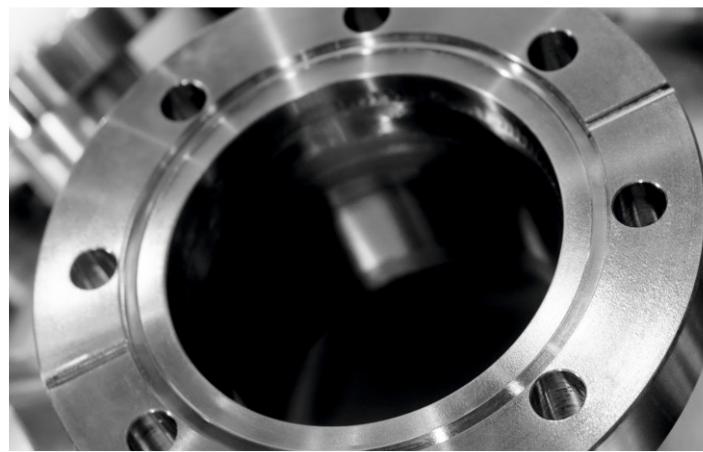

Pipes

- Seamless and welded carbon steel linepipe to API, EN and ISO specifications
- Seamless and welded carbon, alloy, stainless and duplex steel pipes for high and low temperature service to ASTM, ASME, API, EN, ISO and AWWA specifications
- Casing and tubing
- CRA clad pipes
- Boiler, heat-exchanger and precision tubes
- Welded steel pipes with larger diameters (16"-144") and exceptionally heavy wall thicknesses
- Welded structural tubulars for offshore applications
- Pipes made from Monel, Hastelloy, Incoloy and Titanium Alloys, Cuni

Plates, Beams and Profiles

- Carbon, alloy and stainless steel plates
- Structural sections

Fittings, Flanges, Gaskets, Bolts, Nuts, Weld Consumables

- Seamless and welded BW and forged fittings in carbon, alloy, stainless and duplex steels to ASTM, ASME and EN specifications
- Flanges in carbon alloy, stainless and duplex steels to ASTM, ASME and EN specifications
- Fittings, flanges and piping items to client drawings with supporting calculations Metallic and non-metallic gaskets
- Stud bolts, machine bolts, nuts and washers in metric or imperial sizes
- Welding consumables including rods and fluxes
- Insulation materials and repair kits

Valves, Strainers, Traps

- Forged and cast steel valves in carbon, alloy, stainless and duplex steels
- Gate, globe, check, plug, butterfly, wafer check and swing check valves
- Ball valves, trunnion mounted and floating ball, two and three piece, and top entry
- Mechanical, electrical, pneumatic and hydraulic valve actuators
- Strainers and filters
- Steam traps

Extensive customisation for all your project's needs.
